

ACTA-EMBRACE™ ANTI-THRUST CUSHION

- Deep lateral and medial leg contours promote postural alignment.
- Tapered leg adductors increase in width near the back of the cushion to give support to the greater trochanters.
- Anti-thrust shelf provides an anterior pelvic build-up to prevent forward migration.
- Two layers of foam, a contoured moulded base foam with a layer of memory foam, provide comfort and skin protection.
- Comes standard with non-skid bottom and hook and loop attachment.

Adjustable Technology Insert (ATI)

The ATI is constructed of a strong aluminium that is designed to be moulded to add additional support where needed. This system allows for on-site customisation to effectively meet the needs of any user. The dynamic nature of input provides positioning support while allowing for movement. The insert can be remoulded to meet the changes in the user's physical and functional needs.

Acta Embrace™ Back

- Integrated trunk supports are attached to a planar aluminium backrest shell and may be adjusted for angle, height, and up to a total of 3" of width to create a custom supportive shape.
- Aluminium stays on the backside of the two layer foam pad can be molded to support lumbar, scoliosis, and kyphosis needs.
- Aluminium stays are offset from center of cushion, removing pressure points from the spine.
- 9" of total depth adjustment: 5" in front of canes and 4" behind the canes.
- Lightweight durable aluminium shell comes with head support holes.
- Provides pelvic and scapular relief.
- Compatible with lateral hardware. A total of 11" of pad width adjustment (5.5" per side) and over 5" of height adjustment.
- Compatible with head support: 2" wide x 1" tall hole pattern.
- Integrated chest harness strap guides or pre-drilled holes for optional extension strap guides.

Acta Relief Back

- Features flexible, adjustable straps that allow this product to offset the center of pressure and better remove pressure points from the spine.
- This allows for a more aggressive molding to each individual patient's natural anatomy to support many seating positions ranging from upright seating to a severely rotated back.
- Equipped with an oversized aluminium shell cut-out to allow deeper immersion into the back.
- Thick Visco surface layer adds extra comfort and support by contouring to the user's body.
- Designed to effortlessly adjust, the Boa® closure system brings comfort and support to the lower and upper thoracic regions.
- With the Boa® reel and cable system, equal and stable pressure distribution is accomplished in an "off the shelf" back design.
- The open back frame design gives the ability to off-load the pressure typically seen on spinal deformities through the back frame opening.

SEATING + POSITIONING

CURVE® CUSHION

- Mild anti-thrust shelf promotes postural stability and helps prevent forward migration.
- Medial thigh separator promotes postural alignment.
- High density, molded foam increases surface area reducing potential peak pressure areas.
- Non-skid flat bottom fabric offers hook and loop attachment.

M2 ANTI-THRUST CUSHION

- Tapered adductors increase in width near the rear of the cushion to give support to the greater trochanters.
- Deep lateral and medial leg contours promote postural alignment.
- Anti-thrust shelf provides an anterior pelvic build-up to prevent forward migration.
- Coccyx relief cutout reduces pressure on the tailbone and spine.
- Non-skid bottom fabric offers hook and loop attachment.
- Constructed with dual density foam, a moulded foam base, and Quadra3D® Gel pack.

Quadra3D Gel Pack

The pressure-relieving Quadra3D gel pack reduces shear forces and heat build-up. Includes four three-dimensional compartments that evenly distribute gel under the seated surface.

Adjustable Technology Insert (ATI)

The ATI is constructed of a strong aluminium that is designed to be moulded to add additional support where needed. This system allows for on-site customization to effectively meet the needs of any user. The dynamic nature of input provides positioning support while allowing for movement. The insert can be remoulded to meet the changes in the user's physical and functional needs.
