

Easy to push. Hard to beat.

LightGlide is our manual wheelchair model. With its aluminium frame, it is lightweight yet reliable and sturdy. Built in Australia to survive the rigours of all-day use, the engineered aluminium frame cleverly folds to all for easy transport or convenient storage when not in use.

Completely customisable.

LightGlide is a fully-scripted wheelchair, built to the occupant's precise requirements in our Australian workshop.

The LightGlide range offers the user almost endless customisation to provide better mobility and comfort. LightGlide wheelchairs can be adjusted by the user to change wheel positions vertically and horizontally, finetune or change the footplate height, lift, lower, or remove the armrests.

Built to keep up with your lifestyle.

Customised seating.

For ultimate comfort, many seating options are available. Choose customised cushion, backrest and headrest.

Adjustable armrests.

The LightGlide comes standard with full length padded armrests. Optional with height adjustable button lock system.

Easy folding mechanism.

By lifting the seat upholstery from the centre, the LightGlide folds flat enough to fit into a standard car boot space.

Strong, yet light.

The versatile aluminium folding frame is engineered for strength, yet keeps the overall chair weight low.

Wheels.

LightGlide has 24" pneumatic rear wheels with precision bearings for a smooth ride.

Colour choices.

Choose from an extensive colour palette for the ultimate customisation.

LightGlide is the ideal manual chair.

Features.

The LightGlide range.

LightGlide Plus.

This wheelchair adds a few more features, including full length armrests. There is also the ability to remove the armrests for versatility.

LightGlide Sports.

This Sports model is light weight and ready for action. It incorporates the proven LightGlide sturdy folding frame, but dispenses with the armrest and folding footrests to reduce the overall weight.

LightGlide One Arm Drive.

The LightGlide OAD uses a special hand-rim setup to be easily operated one-handed. It features a concertina rear axle that allows the chair to be collapsed easily for storage and transportation.

BoostGlide.

The LightGlide range can also have the Power Assist added to the frame. This system includes powered wheels that replace the existing manual wheels to create a power assisted manual chair.
